

BARRY E. SR. CO.

Stems and stem units illustrated are shown actual size unless otherwise noted. Where it is necessary to illustrate stems and stem units other than actual size, the stem shank is shown as broken and the overall length is indicated.

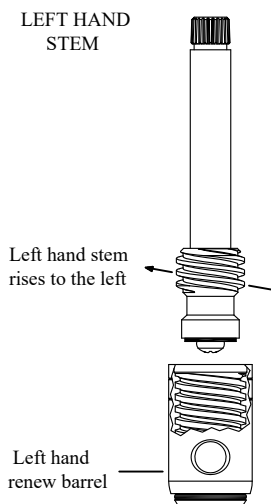

Stem and stem units listed alphabetically by OEM. Within each OEM listing, stems and stem unit are illustrated in overall size order

Behind the stem and stem unit section of the catalog are ceramic disc stem units listed in overall size order. Most stems in this section will also be listed in their OEM sections.

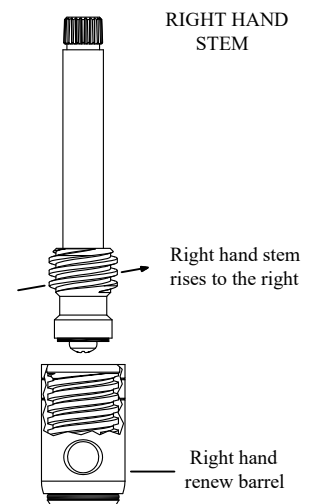

Periodically Barry E. Walter Sr. Company will send out updates to replace existing pages. We will also continue to work on other sections to add to the back of the Catalog. Over time we expect to add seats with a listing of the stems and stem units that use them. Other various items will also be added, such as id gauges, handle bushings, stem extensions, tools, adapters, ballcocks, escutcheon nipples, packings, washers, o-rings, gaskets, and screws.

Order the stems or stem units needed using the part numbers shown for the illustration. Particular attention should be paid when determining if a right hand or left hand stem or stem unit is needed.

The right hand threaded stem or stem unit is generally more popular. To identify a right hand stem, hold the stem in an upright position. The appearance of the threads will be to rise from the left side of the stem to the right side, as shown below. The last number of the part number will indicate a right hand (1) or left hand (2) thread. The first number of the part number will indicate a stem only (2) or any stem unit (4). See the following chart below:

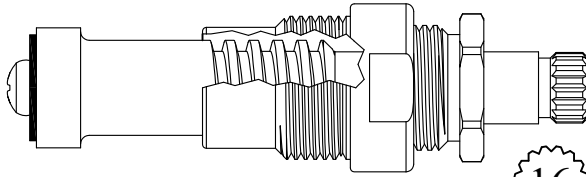

Example Part Number	First & Last Digit	Will be Identified As	Usually This Will Be
268061	2 & 1	Right hand Stem	Hot
268062	2 & 2	Left hand Stem	Cold
468061	4 & 1	Right hand Stem unit	Hot
468062	4 & 2	Left hand Stem unit	Cold

Any usage of original manufactures' names or numbers, product names, and model names or numbers on invoices, quotes, or packing slips are strictly for descriptive and identification purposes. All drawing representations or depictions of original manufactures' products in Barry E. Walter Sr. Co. catalogs or faxes are strictly for identification purposes, and are used to determine the proper Barry Walter Co. replacement part. They are not meant to imply that the parts are manufactured by the original equipment manufacturer.
