CRACK YOU UP

Because even when life's a drain, these jokes flow free.

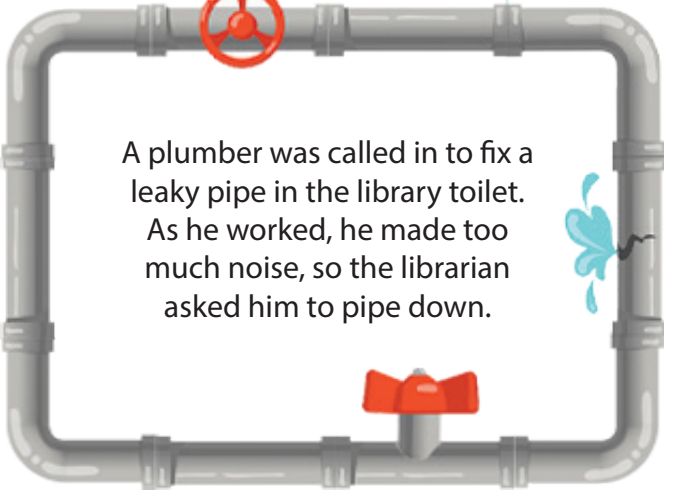

I feel bad for plumbers who install those fancy water heaters that hang on the wall... It's a tankless job.

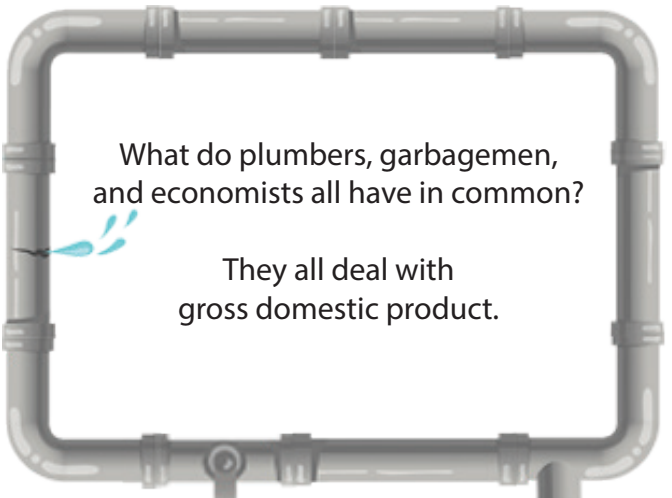

What do you call a room full of cynical plumbers?

A skeptic tank.

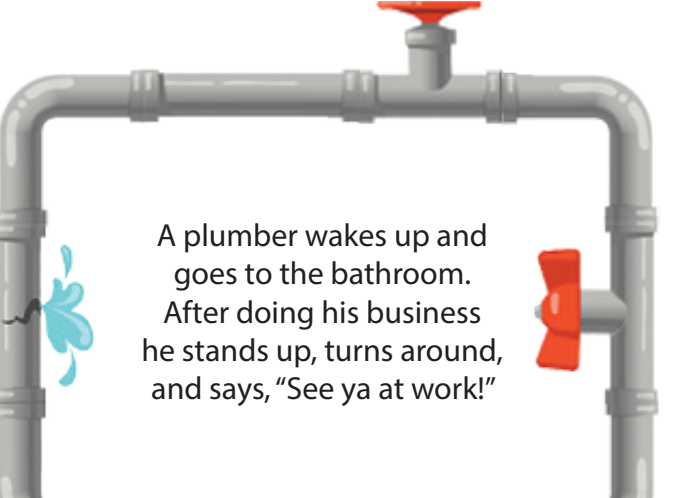

A plumber was called in to fix a leaky pipe in the library toilet. As he worked, he made too much noise, so the librarian asked him to pipe down.

What do plumbers, garbagemen, and economists all have in common?

They all deal with gross domestic product.

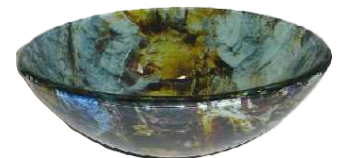

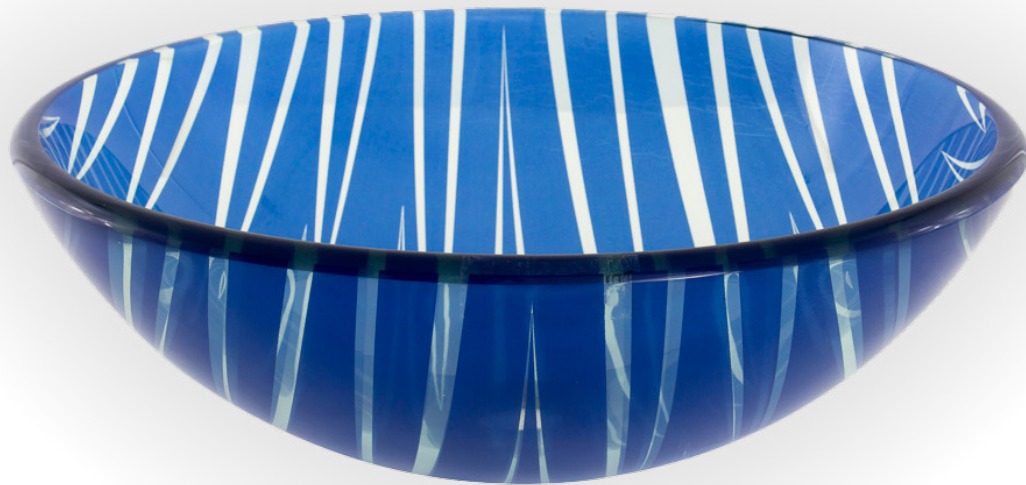

A plumber wakes up and goes to the bathroom. After doing his business he stands up, turns around, and says, "See ya at work!"

Backups are usually a good thing, unless it's a sewer.
